## NEWSLETTER NOVEMBER 2024

### I WONDER WHY

“Science is magic that works”—and it couldn’t be more true! We were excited to introduce our children to the wonders of science. Through a range of experiments, they were discovering the properties of water, fire, light, and magnets, while also exploring the differences between natural and manmade objects. And the opportunity for our children to conduct many experiments on their own made it even more exciting for them!

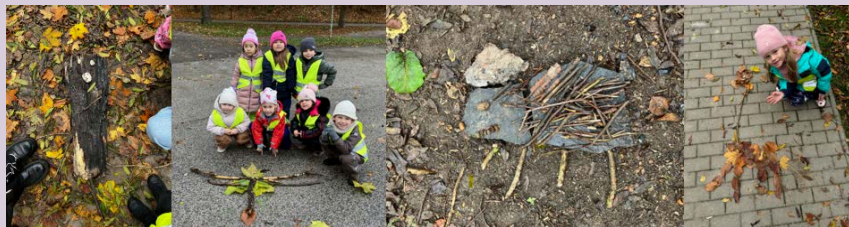

## FOUR ELEMENTS

We continued with science to explore forces and elements around us. In Železná studienka we took a scavenger hunt to experience water, air, fire, and earth – nature’s magic team - working together to keep our world alive, moving, and full of wonder.

## MAGIC SPACE

In Knowember, we nurtured curiosity and sparked questions about stars and planets. We brought big concepts of gravity, solar systems, galaxies and space travel down to the level of children, so they could explore through all their senses.

Cosmos performance was a stellar event combining facts and playful creativity to teach the audience about our solar system's wonders. The funniest part was about farting Jupiter full of gas. 😄

# ME, MYSELF & I

Last November weeks, we focused on social skills and prosocial behaviour. We joined various local or worldwide projects: Odd sock day, Bubnovačka or Christmas charity "How much love..." and hunted for various human superpowers to become kind, strong, brave, unique or just US - simply better versions of ourselves.
